SUMMARY

Software Engineer with **2+ years of experience** building microservices and REST APIs using Java and Spring Boot. Have worked on production systems for **Mastercard and Axis Bank** across payments and banking loan domains. Comfortable with performance testing, CI/CD pipelines, and event-driven architectures. I try to write clean, testable code and pick things up fairly quickly when working with new systems or requirements.

SKILLS

Backend	Java, Spring Boot, Microservices, REST APIs, JPA, Hibernate, RabbitMQ
Database	MySQL, SQL
Testing	JUnit, Mockito, JMeter, BlazeMeter, Postman, Karate
DevOps	Maven, Jenkins, PCF, SonarQube, Dynatrace
Tools	Git, IntelliJ IDEA, Swagger/OpenAPI, Jira

EXPERIENCE

Software Engineer

Feb 2023 – Present

Quest Global Engineering Services Pvt Ltd

Pune, India

- Working on microservices-based systems for payment and banking loan platforms using Java 17 and Spring Boot across multiple client projects.
- Built and maintained REST APIs for use cases like user management, loan processing, payment transfers, and notifications.
- Set up Jenkins pipelines for automated deployments in lower environments, which reduced manual effort noticeably.
- Worked with event-driven systems using Axon (Kafka-based) and RabbitMQ for async communication between services.
- Wrote test suites covering unit, integration, and performance testing using JUnit, Mockito, JMeter, and BlazeMeter.
- Integrated SonarQube and JaCoCo for code quality checks and coverage tracking across services.
- Collaborated with QA, design, and business teams in Agile cycles to ship features and fix issues before production.
- Received the **On the Fly Award** (Sep 2023) from Quest Global for quick delivery and problem-solving on a critical project task.

PROJECTS

Builder Loan Management System

Axis Bank (via Quest Global)

Jan 2026 – Present

- Working on a microservices-based loan management platform built with Spring Boot and Java 17 for Axis Bank's builder financing operations.
- Implemented admin management functionality for builder groups, enforcing a single-admin constraint per builder group with builder group user type handling.
- Worked on builder management service to fix reported issues and added bank detail support for properties, including property type handling for FLAT, PLOT, and RHW categories.
- Fixed SonarQube violations across services and wrote JUnit tests to improve code coverage and maintain quality standards.

Mastercard Send

Mastercard (via Quest Global)

Nov 2024 – Dec 2025

- Implemented currency mandate to support ANG to XCG payments for CUW (Curacao) and SXM (Sint Maarten) regions.
- Added new transaction purpose types including Recycling Deposit Return and Value-Added Tax (VAT) Payment.
- Contributed to building a new unified version of the Mastercard Send payment API that consolidates and extends functionality from existing Send APIs.

Unified Money Transfer

Mastercard (via Quest Global)

Jul 2023 – Oct 2024

- Worked on a Unified Payment API that handles both domestic and cross-border money transfers globally.
- Wrote and maintained test suites covering performance, stability, and architectural integrity using Karate, ArchUnit, and mutation testing.
- Ran API performance and latency testing using JMeter (JMX scripts) and BlazeMeter in MTF and Stage environments.
- Built Jenkins pipelines to automate deployments across lower environments, cutting down repetitive release work.
- Explored event-driven patterns using Axon (Kafka-based) for payment use cases, including a few POCs.

Small Business Banking

Axis Bank (via Quest Global)

Mar 2023 – Jun 2023

- Built microservices for a digital loan application platform using Spring Boot and JPA as part of my initial project at Quest Global.
- Enabled document upload and PAN verification features to simplify the loan processing flow.
- Handled API testing in UAT using Postman and helped identify and fix issues before the production release.
- Worked with QA and design teams to make sure the APIs integrated well with the frontend and UX was consistent.

AWARDS

On the Fly Award, Quest Global Engineering Services Pvt Ltd

Sep 2023

EDUCATION

Bachelor of Technology, NBKR Institute of Science and Technology

2019 – 2022

Diploma in Electrical and Electronics Engineering, Sri Venkateswara Govt Polytechnic College

2016 – 2019
