Professional Summary

Backend Software Engineer with 2+ years of experience building and shipping production microservices for Mastercard's global payment platform and Axis Bank's lending systems. Works primarily with Java 17 and Spring Boot, with hands-on experience in event-driven architecture using CQRS and Event Sourcing (Axon Framework, Kafka). Has delivered features across cross-border money transfers, currency mandate flows, and loan management systems. Comfortable across the full backend delivery cycle, from API design and service integration to CI/CD, testing, and production monitoring.

Technical Skills

Languages and Frameworks: Java 17, Spring Boot, Spring Data JPA, Hibernate, REST APIs, Microservices

Architecture: Event-Driven Architecture, CQRS, Event Sourcing, Axon Framework, Kafka

Databases: MySQL

Caching: Redis (basic working knowledge)

Testing: JUnit 5, Mockito, Karate, ArchUnit, Mutation Testing, JMeter, BlazeMeter, Postman

DevOps and CI/CD: Jenkins, PCF (Cloud Foundry), Maven, SonarQube, JaCoCo, Dynatrace

Tools: Git, IntelliJ IDEA, Swagger/OpenAPI, Jira, Agile/Scrum

Professional Experience

Software Engineer

Feb 2023 – Present

Quest Global Engineering Services Pvt Ltd, Pune

- Designed and shipped **REST APIs** for payment transfers, loan processing, user management, and notifications, serving real banking customers across multiple regions.
- Built event-driven communication between microservices using **Axon Framework** (Kafka-backed CQRS and Event Sourcing) for reliable async transaction processing.
- Set up and maintained **Jenkins CI/CD pipelines** for automated deployments across lower environments, cutting down manual release steps.
- Put in place a **multi-layer test strategy** across all services: unit tests (JUnit 5, Mockito), integration tests, API contract tests (Karate), architectural checks (ArchUnit), performance benchmarks (JMeter, BlazeMeter), and mutation testing.
- Maintained **SonarQube** and **JaCoCo** quality gates, catching and fixing code violations before they reached production.
- Worked in **Agile sprints** alongside QA, design, and business teams to ship production features on schedule.

Projects

Builder Loan Management System

Axis Bank via Quest Global

Jan 2026 – Present

- Building microservices for Axis Bank's **builder financing platform** using Spring Boot and Java 17, handling loan lifecycle management for real-estate builder groups.
- Built the **admin management module** with single-admin enforcement, role-based user types, and support for bank details and property types (FLAT, PLOT, RHW).
- Resolved **SonarQube violations** and wrote JUnit test suites across multiple services to bring code quality up to threshold.

Mastercard Send

Mastercard via Quest Global

Nov 2024 – Dec 2025

- Added **currency mandate support** for ANG-to-XCG payment flows in CUW (Curacao) and SXM (Sint Maarten) as part of Mastercard's Caribbean rollout.
- Introduced new **transaction purpose types** (Recycling Deposit Return, VAT Payment) to extend payment classification on the Mastercard Send platform.
- Contributed to building the **unified Mastercard Send API**, consolidating multiple legacy Send APIs into one extensible interface.

Unified Money Transfer

Mastercard via Quest Global

Jul 2023 – Oct 2024

- Worked on a **global Unified Payment API** supporting domestic and cross-border transfers across multiple regions at Mastercard scale.
- Wrote **performance and latency benchmarks** using JMeter JMX scripts and BlazeMeter across MTF and Stage environments, flagging bottlenecks before production.
- Built **CQRS/Event Sourcing POCs** with Axon Framework (Kafka-backed) to validate async transaction processing for high-throughput payment use cases.
- Maintained test suites covering **API contracts (Karate)**, **architectural rules (ArchUnit)**, and **mutation testing** to keep the system reliable.

- Built microservices for a **digital loan application platform** using Spring Boot and JPA, letting small business customers apply for loans without manual paperwork.
- Implemented **document upload and PAN verification** features, reducing manual steps in the loan onboarding flow.
- Tested APIs in UAT using **Postman**, catching integration issues before production release.

Education

Bachelor of Technology NBKR Institute of Science and Technology

2019 – 2022

Diploma in Electrical and Electronics Engineering Sri Venkateswara Govt Polytechnic College

2016 – 2019

Awards

On the Fly Award **Quest Global Engineering Services Pvt Ltd**

Sep 2023

Recognized for upskilling quickly while working at the client office and for making consistent, valuable contributions to project delivery.
